

Furnaces Operate At Cananea

GREENE CANANEA
PAYS DIVIDEND

Stockholders Receive \$1 per Share; 2500 Men Are Employed at Mine.

Douglas, Ariz., Dec. 6.—The first dividend paid by the Greene-Cananea company since its reorganization was received by local stockholders this week, being \$1 per share. The fractional scrip shares, of which there are now held here, did not bear dividends, this having been the announcement of the company at the time of reorganization.

When the first proposal for reorganization was made to the stockholders by the secretary last July it was explained that the new \$100 shares would be exchanged for five of the old issue of \$20 par value. Fractions of a full \$100 share would be taken up and fractional bearer scrip issued in its stead. This scrip is dealt in by brokers on the unlisted sheet of the stock exchange, but carries no dividends.

For this reason most of the local stockholders either purchased enough fractions to exchange them for full shares, or sold their fractional holdings. The present dividend, while the first since the reorganization, is the first paid by the company, three of 25 cents each having preceded it. The company's property at Cananea shows little change in condition at this time. The contracting system, which is generally in vogue at the mines, together with leading practically all the local, 2000 furnaces of the smelter are still in operation. In all about 2500 men are employed in the camp and the company. General manager J. E. Douglas spent several days in Cananea this week.

W. G. McBride, manager of the Great Western property, and in the city for a short business conference with the Calumet & Arizona smelter heads. His company is now shipping an average of two cars daily to the smelter.

J. A. Judah is operating the Agua Buena property a few miles from Nogales with good results. The company is shipping regularly to the Copper Queen smelter here. Judah has promised to send a specimen of his ore to the local chamber of commerce.

EL PASO MAN TAKES
INDEPENDENCE MINE

Property Near Kirkland Will Be Worked on Royalty, With Privilege of Purchase at \$2000.

Prescott, Ariz., Dec. 6.—William M. Asher, of El Paso, and Arthur C. McAdams, of Brooklyn, N. Y., have taken an option on the Independence mine, near Kirkland, owned by Charles Brown and John F. Brown. The mine is to be worked on a royalty of 10 percent and if McAdams and Asher decide to purchase, they will pay \$2000 for it.

A splendid body of sulphide ore has been struck on the 350 foot level of the Copper Queen mine, near Stoddard. The strike was made in a drift being run northward from the main shaft. This is the greatest depth ever attained on the Copper Queen and the showing is regarded as significant.

Five six mule teams are now used in freighting the ore from the Independence mine, in Copper basin, to Skull Valley station. There it is loaded on cars for shipment to the Copper Queen smelter at Douglas, the Commercial being controlled by Copper Queen people.

It is reported that the Commercial company has made a contract to deliver 50 tons daily to the Cox United Verde Copper company for the Jerome smelter. The ore is shipped to Jerome via average about four percent copper, too low for shipment to Douglas. It is silicious in character, hence the safety of the United Verde to obtain it. An immense tonnage of this low grade ore is in the stopes and on the dumps.

At the Henrietta mine, 10 men are stopping ore that averages from \$40 to \$50 a ton. Ten more men will be put to work in a few days. The electrification of the plant will be completed December 10, the necessary motors and other machinery having been on the ground for some time.

M. M. Walker has put a force of men at work unwinding the workings of the Copper Princess mine. On this property there is a 75 foot shaft from which a 25 foot crosscut and 60 foot shaft have been run.

Work is to be resumed at the Bunker mines, owned by the Arizona Gold Mines company. It is located between Lynn creek and Chaparral.

SHAFT COMPLETED
TO SEVENTH LEVEL

Calumet & Arizona Will Be Enabled to Handle a Larger Tonnage and at Lower Cost.

Ray, Ariz., Dec. 6.—The three compartment shaft on the property of the Calumet and Arizona Mining company at Superior has been completed to the seventh level, which will enable the company to remove the ore in a more economical manner, and also handle a larger tonnage. J. E. Douglas, superintendent of the company's interest at Superior, paid Ray a visit and appeared very much pleased with the progress of development work. It is already being cut on the 700 foot level at the end of the shaft and drifting will shortly be started from the point. The large pumps recently installed handle the water from the mine easily making working conditions better than heretofore. Seventy-five men are now employed by that company.

O. Thompson, of Winkelman, has made an initial shipment from his property in the Catalina mountains to the El Paso smelter, running about 14 percent copper with small gold and silver values.

Specimens of ore from the Chittenden mine, which is located near the London Arizona Mining company's properties, are being shipped to Winkelman and are the finest specimens of copper ore shown for some time. Mr. Chittenden is the sole owner of the property, working it on a small scale and states that the ore nets about \$1000 a month from the mine. Being adjacent to the property of the London Arizona Mining company, a consolidation is looked for by local mining people.

Manager L. S. Cates, of the Ray mine, and wife have returned to Ray from a trip to Salt Lake City, where they went for the purpose of buying their infant child who recently passed away.

TONTON COMPANY IS
TO SINK OIL WELLS

Roosevelt, Ariz., Dec. 6.—A drill rig and all necessary machinery have been set up across Lake Roosevelt from this place by the Tonto Basin Oil company, headed by Col. James A. Fleming, of Globe. All that is now lacking is the completion of the small water supply pipe line. The company expects to be drilling within 30 days. The rig is capable of sinking to a depth of 4000 feet. It is believed, however, that oil will be struck at a depth of about 1000 feet, of which will be through the bed of the prehistoric lake that once covered that region. Geologists say that when the lake bed is reached the chances for finding oil will be good.

GRAND CANYON IS
SHOWING UP RICHLY

Grannis Makes Strike on Waldron Claim; Atlantic & Pacific Mine Is Prospecting Good Property.

Kingman, Ariz., Dec. 6.—A surprising showing has been opened by J. P. Miller, who has a contract to do development work on the Grand Canyon mine, in Deluge wash. Samples taken along the vein give results of 15 per cent copper, 10 ounces silver and \$3 gold to the ton. In places the vein is 20 feet wide and good values are shown throughout the outcrop. The owners are preparing to do much work on the Grand Canyon during the winter. W. D. Grannis has made another strike on the Waldron claim, also in Deluge wash. He has opened ore that averages \$100 a ton in gold, silver and lead.

J. C. Potts and Thomas Hogan have a good showing of ore on the Atlantic & Pacific mine, near Thumb butte.

An average samples taken across a five foot face on the 550 foot level of the Boundary Cone mine have results better than \$25 a ton in gold. This ore is free milling and engineers believe that most of the values can be saved by amalgamation. The mine is owned by the Burro and Telegraph claims, on Burro creek. Mr. Pinnarty, well known mining engineer, is making a detailed examination. These claims are located on one of the largest gold and silver bearing veins in the country.

Sinking has been resumed in the main shaft of the Golconda mine. The object is to open at depth the bodies of ore that show in the upper drifts.

TAKES LEASE ON
SIX GOLD CLAIMS

Carrizozo, N. M., Dec. 6.—Lin Brunson and Thomas Stonerack, who reside in the northern part of Lincoln county, have closed a lease and option with George R. Bent, of Alamogordo, in which Mr. Bent takes over six gold claims in the Leadville district, near the town of White Oaks and about 12 miles east of Carrizozo. It is reported that Mr. Bent will begin active operations on the property at an early date.

NEW COMPANY TO WORK
CLAIMS IN SOCORRO COUNTY

Santa Fe, N. M., Dec. 6.—A \$2,000,000 corporation, the San Lorenzo Land and Mining company of Santa Fe, has filed incorporation papers with the state corporation commission. The company intends to develop copper deposits and lands near San Acacio, Socorro county, and starts in with a paid up capital of \$500,000, and R. L. Baca, speaker of the legislative house, as statutory agent. The incorporators and directors are: R. L. Baca, 450 shares; John R. McPhee, E. P. Davies, Mrs. M. H. Byrd, K. L. Patterson, each 10 shares, and R. L. of Santa Fe.

SURVEYOR GENERAL APPROVES
OREGON MINERAL SURVEY

Santa Fe, N. M., Dec. 6.—Although there has been very little mine development of late in New Mexico except in Grant county, the state surveyor general John W. March has approved the mineral survey of the Oregon group in the Organ mountains. The group consists of the Oregon, Michigan and Easy Picking lodes. The survey is approved preliminary to the granting of the lodes. Of late considerable interest is being manifested in the Organ district.

CHARGED WITH VAGRANCY.
SAYS HE IS RACE HORSE MAN

Bill Nye, charged with vagrancy, told Judge Ballard, of the corporation court, that he was a race horse man. He brought Clyde Thomas of Corvallis, Kas., here to make a jockey out of him. Thomas told the judge that Nye owed him \$20, some of it borrowed money, and he was unable to get any of it. Nye claimed to be the manager of some horses now running on the Jura track.

Judge Goldwell held the case against Nye open until Wednesday saying that he would give the defendant that time to come in and pay the boy his money.

Words of Praise
For Mayr's Wonderful
Stomach Remedy

"How thankful we are to you for getting a hold of your Wonderful Stomach Remedy. My wife could not live if she had not taken your Wonderful Remedy when she did. One more of those paroxysms of pain she was having would have killed her without a doubt. Now she is free from all pain, free from heart trouble and free from that disturbing Neuralgia—all the results of five treatments—and the expulsion of five or six hundred Gall Stones. Now she is able to eat anything she wants and her appetite is good and before taking your medicine she had no appetite and when she ate anything she would suffer death for so long and could not sleep at night; since taking your treatment she sleeps well all night long. T. A. Neill, Roanoke, Texas."

The above letter should convince you more than anything we could say in behalf of Mayr's Wonderful Stomach Remedy. Sufferers should try one dose of this Remedy—one dose should convince them that they can be restored to health. Newly discovered ailments are caused by the closing of the intestinal tract with mucus and catarrhal secretions allowing poisonous fluids into the stomach and other organs deranging the digestive system. Mayr's Wonderful Stomach Remedy patently removes these secretions and restores surgical operation and puts an end to Colic Attacks, Gases in the Stomach and Intestines and all of the usual symptoms of Stomach, Liver and Intestinal Ailments. Ask your druggist about Mayr's Wonderful Stomach Remedy or send to Geo. H. Mayr, Mfg. Chemist, 154 Whiting St., Chicago, Ill. for free booklet on Stomach Ailments and many grateful letters from people who have been restored. Kelly & Pollard, Potter Drug Co.—Advertisement.

REDUCES FINE TO FIT THE
MONEY LOGAN HAD LEFT

George Logan, who patronized A. A. Funk testified, was flustering a cash register in a saloon in a playful manner, was fined \$5 on a charge of being drunk, by Judge Ballard, of the county court, on Friday afternoon.

Logan said that he had just got out of the county jail where he had spent two months. A "loud mouthed" individual in the saloon he said took advantage of his weak physical condition and made him buy the drinks. As soon as he placed \$2 on the bar, Logan said that "intuitively he felt that he had been 'joked'."

When the judge learned that \$2 had been taken from the man when he was brought to the station he reduced the fine to that amount.

BOY PAROLED ON PROMISE TO
LOOK FOR A PLACE TO WORK

Bernard Grubb, charged with being a delinquent child on the juvenile dock of the 34th district court, was paroled by Judge Dan M. Jackson, Friday afternoon. The condition of the parole was that Grubb secure a position and report to county probation officer Mrs. Emma Webster every Saturday afternoon at 1:30 o'clock.

Grubb's home is in El Paso, but he went to Houston, Texas, to look for a job, so he told Judge Jackson.

"El Paso is just as good as Houston," Judge Jackson said. "The boy promised he would make every effort to secure a position here and report to Mrs. Webster every Saturday afternoon."

25,000,000 COPIES OF THE
BIBLE ARE PRINTED IN YEAR

Toronto, Ontario, Dec. 6.—Twenty-eight million copies of the Bible and books containing portions of the scriptures are printed in the world each year, according to a report compiled here for publication on "Bible Sunday," Dec. 7. Private publishers issued 16,000,000 of the books and the various Bible societies published the rest. The American Bible society, the British and Foreign Bible society, put out 14,000,000 copies.

DIARIO ASSAILS
WILSON POLICY

Declares United States' Attitude Toward Mexico Opposite to Dreyfuss Affair in France.

Mexico City, Mex., Dec. 6.—Commenting on the initiative in connection with the national guard taken by James Hay, congressman from Virginia, in introducing the army volunteer bill in the house of representatives at Washington, El Diario says:

"Following president Wilson's flat declaration that he will not intervene by force of arms in our affairs, Mr. Hay asks the American congress to give the executive ample powers to call on the national guard for active service."

The newspaper proceeds to comment sarcastically upon the unanimity of thought, indicated by the contradictory attitude of president Wilson and of the chairman of the house of representatives committee on military affairs. It continues:

"The Mexican question has had, perhaps in a minor degree, the effect of the Dreyfuss case in France—of confounding all criticism with this difference, however, that, although the citizens and partisans of France lost their heads, the government of France maintained its serenity and coolness. In the United States, the first to lose its bearings was the government and today, the citizens and partisans in the United States show themselves to be under better self control than the chief American magistrates. His change of front toward us, accentuated by the press and influential leaders, has long been noticeable. Since nothing happens without good coming from it, the rebels themselves, the spoiled children of president Wilson, have by their evil deed inspired the American people of the conservative press, the leaders of the senate and of the house of representatives, with the conviction that the aims of the revolution are unworthy and a menace to civilization."

"In any event, it will always be a consolation to us that in the American congress there are such leaders as Mann to defend us against the rage of the government. The situation is parallel to that in France, when Jules Favre and his friends defended us against the second empire which trampled us and which the government in the white house would like to do."

BIBLE ARE PRINTED IN YEAR

Toronto, Ontario, Dec. 6.—Twenty-eight million copies of the Bible and books containing portions of the scriptures are printed in the world each year, according to a report compiled here for publication on "Bible Sunday," Dec. 7. Private publishers issued 16,000,000 of the books and the various Bible societies published the rest. The American Bible society, the British and Foreign Bible society, put out 14,000,000 copies.
